① City of Seattle Water Dept (206) 625-4307
Water Quality & Inspections who had

Discussion:

no information or idea of how many private wells may still be in use. Tolt Rivers source of municipal drinking supplies ② Referred me to Nancy Steinfort of the State's Water Supply and Waste (206) 464-6752 who had no information on private wells but referred me to ③ King County Health Dept. Larry Kerschner (206) 587-2722 who was not sure how many private wells "but very few". He recommended I call Harry Cox a County sanitarian who is knowledgeable with the area; he also said that by checking the WDOE well logs, we would have a good idea of the numbers of private wells. I asked him if the Water Supply Bulletin #29 (1963) would represent the limit of #s of private wells since I would assume that since the date of that publication more folks would be on municipal supplies. He agreed and said that it is doubtful any additional private gw wells have been installed in the City since 1963.
